

In accordance with 37 C.F.R. §§ 1.97 and 1.98, a copy of each of the listed references or relevant portion thereof that is not a US patent document is also enclosed.

Statement of Relevance of References Listed
Unaccompanied by English Translation
Under 37 CFR § 1.98(a)(3)

In accordance with 37 CFR § 1.98(a)(3), the following concise explanation of the relevance of each listed reference that is not in the English language and unaccompanied by a translation into English is provided.

Germany Patent No. DE 3 107 838: An antenna (aerial) support made of plastic has a tube cross-section with especially high flexural stiffness but low shear resistance. The tube cross-section corresponds to a double-wall tube whose annular space formed between the outer tube and inner tube is bridged by webs (2) which extend along surface lines distributed around the tube circumference and are firmly joined to both tubes. A process for producing plastic tubes with a tube cross-section of this kind, the material consisting of polyester resin or epoxy resin with a reinforcing fibre insert of glass fibres or carbon fibres, comprises the following process steps: a) production of a thin, flat outer wall (1) which is still flexible in the completely cured state and whose maximum width corresponds to the circumference of the outer tube; b) attachment of already cured webs (2) onto a still-uncured inner layer of the outer wall (1) spread out on a flat substrate; c) production of the inner wall (3) on a core corresponding to the interior space of the tube; d) attachment of the outer wall (1) provided with webs (2) onto a still-uncured outer layer of the inner wall (3).

French Publication No. 2 398 247: discloses what appears to be reinforced structures as depicted in Figures 1-5.

Dated this 31st day of August 2005.

Respectfully submitted,

DANA L. TANGREN
Attorney for Applicant

Form PTO-1449

Applicant: Gerardus Maria Van Erp
Serial No.: 10/528,854
Filing Date: March 23, 2005
For: STRUCTURAL ELEMENTS FORMED FROM CASTABLE MATERIAL

Sheet 2 of 2

Confirmation No.: 4190
Att'y Docket No.: 13869.52
Art Unit: 1732

References Cited by Applicants

While the filing of Information Disclosure Statements is voluntary, the procedure is governed by the guidelines of Section 609 of the Manual of Patent Examining Procedure and 37 C.F.R. §§ 1.97 and 1.98. To be considered a proper Information Disclosure Statement, Form PTO-1449 shall be accompanied by a copy of each listed patent or publication or other item of information and a translation of the pertinent portions of foreign documents (if an existing translation is readily available to the applicant), an explanation of relevance of each reference not in the English language, and should be submitted in a timely manner as set out in MPEP Sec. 609.

Examiners will consider all citations submitted in conformance with 37 C.F.R. § 1.98 and MPEP Sec. 609 and place their initials adjacent the citations in the spaces provided on this form. Examiners will also initial citations not in conformance with the guidelines which may have been considered. A reference may be considered by the Examiner for any reason whether or not the citation is in full conformance with the guidelines. A line will be drawn through a citation if it is not in conformance with the guidelines AND has not been considered. A copy of the submitted form, as reviewed by the Examiner, will be returned to the applicant with the next communication. The original of the form will be entered into the application file.

Each citation initialed by the Examiner will be printed on the issued patent in the same manner as references cited by the Examiner on Form PTO-892.

The reference designations "A1," "A2," etc. (referring to Applicant's reference 1, Applicant's reference 2, etc.) will be used by the Examiner in the same manner as Examiner's reference designations "A," "B," "C," etc. on Office Action Form PTO-1142.
